## Software Generation News

Our Partner in Texas

**New web site** - Check out the new web site is up and running with better support for you! [www.softwaregeneration.net](http://www.softwaregeneration.net)

**Core module training videos now online** - Training when you want it at a price you can afford "FREE". When that new employee comes on board or changes jobs and needs training, the videos are there. **No waiting. No cost. Your schedule.**

We provide low cost lecture style training for large groups. Hands-on training is too expensive to train everyone. Even custom onsite training can be expensive. "Training the trainer" styles only train the trainer. **Call Mickey or Tom for more info or a quote.**

**Remember to check out the web site for free training opportunities!**

**Training options include:**

- Scheduled Classes
- Onsite Custom Training
- User Group Seminars
- Vendor Presentations
- Web Demonstrations
- Experiment in online video training

## Alere Accounting 6.0 Coming soon!

Here are the major new features that you will see in the upcoming release of **ALERE Accounting v6.0.**

**Multi-Currency** - This is a new module that supports the selling and purchasing functions using a foreign currency. While a separate module, this functionality reaches deep into virtually every aspect of the accounting process but does so in an easy-to-use manner. Even the popup calculator has built in support for multi-currency. A *Rate History* screen provides a way of analyzing rate trends either numerically or using 2 and 3D charts.

**Purchase Requisitions** - A complete requisition process that permits you to just type in a description of the items to be purchased along with a quantity and optional clarifying notes without using an item number or even indicating a supplier. The requisitions can then be reviewed, approved, and released as a quote or as a purchase orders.

**Mass Invoicing** - Here is a new screen that lists all open sales orders and sales returns and permits you to mass ship and/or invoice them all at one time. Shipping charges may be added and locations are supported.

**Executive Advisor Drill Down** - Double click on the number or select the button next to it to see a report with the supporting detail. The reports can be printed and are standard product reports.

**Reports** - Reports can now be re-sized or minimized and behave in a manner consistent with the screen-on-screen style of the rest of the product. Movement between pages is fast, including jumping to the last page, and there are optional two page and four page layouts. Many reports have had layout changes and color added to them along with many new filtering options.

This new version of ALERE Accounting is going to be a significant release with changes that reflect TIW's ongoing commitment to listening to what our Dealers and clients have requested.
